

How have the number of malaria deaths changed over time in Madagascar?

Between 2000-2014, Madagascar had less than 1,000 deaths per year due to Malaria. Looking at the chart, it showed me the number of deaths per year Madagascar had. Lining the per year amounts up in the chart, none of them surpassed the 1,000 marks.

Darker shading marks a higher number of deaths caused by Malaria. Select a country on the map to explore how the number of malaria deaths have changed over time.

Kenya has the highest deaths per year due to Malaria. Places with a higher number of deaths are indicated by the darker shading on the map. I selected Kenya on the map, and it showed the average deaths per year and day.

How have the number of malaria deaths changed over time in South Africa?

Deaths per year caused by Malaria in South Africa decreased after 2000. From 2001-2014 the number of deaths decreased by over half. The chart shows how much the deaths decreased and which years it decreased.
